Sino-American Silicon Products Inc. Fiscal 2010 Business Report

SAS total consolidated revenue for 2010 was NT\$22.53 billion, an 89 percent increase compared to the prior fiscal year. Net income reached NT\$3.569 billion, while diluted earnings per share was NT\$10.5. Revenue and profit both hit records high. Consolidated revenue for 2010 represents SAS' thirteenth consecutive year of revenue growth since 1998.

Global economy is on its gradual recovery course through 2010. Because of global government-led efforts to boost energy efficiency and low carbon policy, SAS revenue including solar, semiconductor and LED sapphire products and profit both grew fiscal quarter by fiscal quarter. We consistently ramp up production capacity to meet rapid demand. Revenue for December 2010 represents the 41st consecutive month of revenue growth, exclusive of financial crisis. Profit even hit a fresh record high since established.

SAS continues to expand production capacity for solar line by increasing 100 % to 800MW by the end of December 2010, up from 400MW in the fourth quarter of 2009, which led solar industry in 2010 shipments. Since SAS transition efficiency of A⁺ product is superior to peers and huge demand for solar products, SAS hit full capacity utilisation of its plant in solar in 2010. In terms of price, as silicon wafer is in the upstream sector of the solar industry, the price of silicon wafer shows an increasing trend by quarterly since December. In terms of cost, the high growth in demand since Q3 2011 has caused polysilicon shortage in spot market. Top management strived to negotiate price and sign contracts with polysilicon manufacturers to ensure the supply of material. Furthermore, in order to ensure the long-term supply of materials, top management have strengthened the supply of material through negotiation with current vendors, global sourcing and strategic investment for the scale of operation in the long run.

In semiconductor unit, the Semiconductor Department of SAS Group have completed an additional of 30% capacity expansion in 2011, which hit full capacity utilisation of its plant and phase in 8 inch product to enhance value-added service. On the one hand, Globitech, a US-based subsidiary of SAS, held the grand opening ceremony for its fab 2 on December 21 to expand capacity. Globitech is currently the No.1 epi-wafer maker in North America. On the other hand, Kunshan Sino silicon Technology Co., Ltd. (SST), a China-based subsidiary of SAS, in response to achieve the synergy of vertical integration and new production phase-in, has planned capital investment to increase capacity of 6 inch and 8 inch polishing process.

In LED sapphire substrate unit, because of the massive demand for LED TV and electronic backlight module, ASP of LED benefited from shortage. Revenue for 2010 is up 300% YOY. SAS has announced the result of new generation LED ingot and therefore self-production ratio rise will stabilize profit. With the growing capacity production and shipment, LED sapphire revenue will continue to grow at a robust pace.

Outlook for 2011, macroeconomy and industry were fraught with uncertainties including pressure from strengthening NT dollar, economic impact of Japan earthquake, Italian solar policy since Q1 and European credit crisis. In the long run, market potential for the three

products is quite bright. Therefore, top management will expand the scale of operation to enlarge shareholders' equity with more careful attitude and stable pace.

Strategies for three products are as follows:

- (1) Solar: Expand capacity of solar wafers, develop the high efficiency products and through strategic investment to strength the synergy of vertical integration
- (2) Semiconductor: Expand the capacity of semiconductor wafer to increase the ratio of 8 inch wafer
- (3) LED sapphire substrate: Establish fabrication plant and develop large diameter sapphire wafers and ingot

Top management will plan capacity expansion based on market conditions and enhance the synergy through strategic alliance. Furthermore, SAS has split itself into three independent companies for the preparation of growth and working capital. SAS has confidence to achieve outstanding performance consistently to thank for shareholders' support.

Those financial statements were audited by other auditors, whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for GlobiTech Incorporated and Sunrise Global Solar Energy Corp., is based solely on the reports of the other auditors. Independent Expert Opinion to the Stock Exchange Ratio of the Spin Out

In order to improve the competitiveness and operation performance through corporate restructure and work specialization, Sino-American Silicon Products Inc. (the "SAS") is in contemplation to spin out the business (including related assets, liabilities and operation) operated by its Semiconductor Division to form a 100% owned subsidiary (the "Spin Out"), GlobalWafers Co. (the tentative name "GlobalWafers"), in exchange for GlobalWafers' total shares as consideration. As a result, GlobalWafers will assume the business of Semiconductor Division of SAS.

1. Calculation of the Stock Exchange Ratio of the Spin out

- a. The value of the Spin Out business is referred to the book value of the related assets (the "Transferred Assets") and liabilities (the "Transferred Liabilities") stated in SAS's audited financial statements ended December 31, 2010.
- b. The book value of the Transferred Assets is NTD7,771,000,000, and the book value of the Transferred Liabilities is NTD841,000,000. Therefore, the value of the Spun-out Business is NTD6,930,000,000. The book value of the Transferred Assets and Liabilities as of December 31, 2010 are set out as follows:

Accounts	Amount (NTD*000)
Assets	
Current assets	3,096,000
Funds and long-term investments	4,292,000
Fixed assets	357,000
Intangible assets	0
Other assets	26,000
Total Assets (1)	7,771,000

Current liabilities	579,000
Long-term liabilities	0
Other liabilities	262,000
Total Liabilities (2)	841,000
Value of the Business (1)-(2)	6,930,000

Source : Sino-American Silicon Products Inc

- c. GlobalWafers will issue 180 million fully-paid common shares to SAS at a price of NTD38.5 per share in exchange for the Spin Out business.

2. The Reasonableness of the Stock Exchange Ratio

SAS will transfer the related assets, liabilities and operation of its Semiconductor Division, i.e., the Spin Out business, to the newly incorporated GlobalWafers through a spin out, and in exchange, GlobalWafers will issue 180 million fully-paid common shares to SAS. Thus, the exchange ratio in such Spin Out will depend on the valuation of the Spin Out business and the calculation of the price of each share to be issued by GlobalWafers, both of which are set forth as follows:

- a. The main purpose of this Spin Out is to restructure the SAS, rather than an actual transaction. According to the interpretation letter, Gi-Mi 128 dated June 14, 2002, issued by the Accounting Research and Development Foundation (the "Interpretation Letter"), with respect to the accounting for a spin out transaction, that a company (the Transferring Company) transfers its business to another (the "Transferee Company") and acquires shares from the Transferee Company is a corporate restructure by nature if these two companies have been affiliate companies prior to such transaction. Therefore, for the Transferring Company, the costs of acquiring shares shall be calculated by the book value of transferred assets (after adjusted depreciation, if any) less that of transferred liabilities without recognizing any gain exchanged, and for the Transferee Company, the costs of acquiring assets and liabilities shall be calculated based on the book value of transferred assets and liabilities (after adjusted depreciation, if any), and shall use the net of the assets and liabilities as the basis. The capital of the Transferee Company shall be the par value of shares issued and the stock premium shall be credit to capital reserve. Accordingly, it is reasonable for SAS to transfer its assets and liabilities to GlobalWafers at a price calculated based on the book value.
- b. GlobalWafers will issue 40 million fully-paid shares at a price of NTD38.5 per share to SAS, the net value of which is NTD6,930,000,000, equal to the value of the Spin Out business, that is, net of the book value of the Transferred Assets and Liabilities. Since GlobalWafers will be a subsidiary wholly owned by SAS after the consumption of this Spin Out and its net value will be equal to the value of the Spin Out business, the stock exchange ratio in this Spin Out is reasonable.

3. To conclude, considering that the stock exchange ratio in this Spin Out is calculated based on the book value of the Transferred Assets and Liabilities stated on SAS's audited financial statements ended December 31, 2010, Taiwan Sapphire will issue 180 million fully-paid common shares at a price of NTD38.5 per share to SAS, and pursuant to the Interpretation Letter, such stock exchange ratio is reasonable. Besides the Transferee Company in this Spin Out, GlobalWafers, will be a SAS wholly owned subsidiary, this Spin Out will not prejudice SAS's shareholders'

equity.

Sino-American Silicon Products Inc.

Independent Expert Opinion to the Stock Exchange Ratio of the Spin Out

In order to improve the competitiveness and operation performance through corporate restructure and work specialization, Sino-American Silicon Products Inc. (the "SAS") is in contemplation to spin out the business (including related assets, liabilities and operation) operated by its Sapphire Division to form a 100% owned subsidiary (the "Spin Out"), Sapphire Technology Co. (the tentative name "Taiwan Sapphire"), in exchange for Taiwan Sapphire's total shares as consideration. As a result, Taiwan Sapphire will assume the business of Sapphire Division of SAS.

1. Calculation of the Stock Exchange Ratio of the Spin out

- a. The value of the Spin Out business is referred to the book value of the related assets (the "Transferred Assets") and liabilities (the "Transferred Liabilities") stated in SAS's audited financial statements ended December 31, 2010.
- b. The book value of the Transferred Assets is NTD1,762,000,000, and the book value of the Transferred Liabilities is NTD162,000,000. Therefore, the value of the Spun-out Business is NTD1,600,000,000. The book value of the Transferred Assets and Liabilities as of December 31, 2010 are set out as follows:

Accounts	Amount (NTD*000)
Assets	
Current assets	1,481,000
Funds and long-term investments	0
Fixed assets	281,000
Intangible assets	0
Other assets	0
Total Assets (1)	1,762,000
Liabilities	
Current liabilities	162,000
Long-term liabilities	0
Other liabilities	0
Total Liabilities (2)	162,000
Value of the Business (1)-(2)	1,600,000

Source : Sino-American Silicon Products Inc

- c. Taiwan Sapphire will issue 40 million fully-paid common shares to SAS at a price of NTD40

per share in exchange for the Spin Out business.

2. The Reasonableness of the Stock Exchange Ratio

SAS will transfer the related assets, liabilities and operation of its Sapphire Division, i.e., the Spin Out business, to the newly incorporated Taiwan Sapphire through a spin out, and in exchange, Taiwan Sapphire will issue 40 million fully-paid common shares to SAS. Thus, the exchange ratio in such Spin Out will depend on the valuation of the Spin Out business and the calculation of the price of each share to be issued by Taiwan Sapphire, both of which are set forth as follows:

- a. The main purpose of this Spin Out is to restructure the SAS, rather than an actual transaction. According to the interpretation letter, Gi-Mi 128 dated June 14, 2002, issued by the Accounting Research and Development Foundation (the "Interpretation Letter"), with respect to the accounting for a spin out transaction, that a company (the Transferring Company) transfers its business to another (the "Transferee Company") and acquires shares from the Transferee Company is a corporate restructure by nature if these two companies have been affiliate companies prior to such transaction. Therefore, for the Transferring Company, the costs of acquiring shares shall be calculated by the book value of transferred assets (after adjusted depreciation, if any) less that of transferred liabilities without recognizing any gain exchanged, and for the Transferee Company, the costs of acquiring assets and liabilities shall be calculated based on the book value of transferred assets and liabilities (after adjusted depreciation, if any), and shall use the net of the assets and liabilities as the basis. The capital of the Transferee Company shall be the par value of shares issued and the stock premium shall be credit to capital reserve. Accordingly, it is reasonable for SAS to transfer its assets and liabilities to Taiwan Sapphire at a price calculated based on the book value.
- b. Taiwan Sapphire will issue 40 million fully-paid shares at a price of NTD40 per share to SAS, the net value of which is NTD1,600,000,000, equal to the value of the Spin Out business, that is, net of the book value of the Transferred Assets and Liabilities. Since Taiwan Sapphire will be a subsidiary wholly owned by SAS after the consummation of this Spin Out and its net value will be equal to the value of the Spin Out business, the stock exchange ratio in this Spin Out is reasonable.

3. To conclude, considering that the stock exchange ratio in this Spin Out is calculated based on the book value of the Transferred Assets and Liabilities stated on SAS's audited financial statements ended December 31, 2010, Taiwan Sapphire will issue 40 million fully-paid common shares at a price of NTD40 per share to SAS, and pursuant to the Interpretation Letter, such stock exchange ratio is reasonable. Besides the Transferee Company in this Spin Out, Taiwan Sapphire, will be a SAS wholly owned subsidiary, this Spin Out will not prejudice SAS's shareholders' equity.
