

- Background: SAS has dedicated in Renewable Energy for years, also installed PV System in many schools-rooftop. Besides the power plant build up, we hope to bring the knowledge to our next generation.
- Vision: Bring the knowledge of Renewable Energy to the Rural Schools.
- Target: Educate our children that solar energy is safe (S), affordable (A), sustainable (S) clean resources.
- Activities: We have successfully completed activities in 4 schools, and plan another 6 schools this year.
